

SINGAPORE SOCIETY OF RADIOGRAPHERS

Affiliated to The International Society of Radiographers and Radiological Technologists (I.S.R.R.T)

“Musculoskeletal Ultrasound” Hosted by Singapore Society of Radiographers

Date and Time: March 15, 2019 , 18.30-21.30

Venue: SIT, Singapore

Speaker: Peter Murphy,
Sonographer, Australia

Course description: This course will focus on learning ultrasound image acquisition, normal sonoanatomy, the standardised examination techniques and ultrasound findings in basic pathology

Expected outcomes:

Upon completion of the course, the participants will be able to understand how to:

- application, indications and limitations of musculoskeletal ultrasound
- To identify the sonographic pattern of the different musculoskeletal tissues
- To identify normal sonographic anatomy of each major anatomic area (i.e. shoulder, elbow, ankle and foot)
- To learn the systematic standardised scanning technique for each major anatomic area (i.e. shoulder, elbow, ankle and foot)
- To identify basic musculoskeletal abnormalities of the shoulder, elbow, ankle and foot.

Schedule:

Time	Topic
17.30-18.30	Registration
18.30-19.00	Shoulder Scanning <ul style="list-style-type: none">- Lecture on anatomy and pathology- Real-time scanning
19.00-19.45	Elbow Scanning <ul style="list-style-type: none">- Lecture on anatomy and pathology- Real-time scanning
19.45-20.45	Ankle and Foot Scanning <ul style="list-style-type: none">- Lecture on anatomy and pathology- Real-time scanning
20.45-21.30	Hands-on and Q&A
